

FOR IMMEDIATE RELEASE

MoodleMoot UK 2010 – 10 weeks to go

Pre-registrations pass the 300 mark and call for papers released

A lot has happened since we first announced that ULCC will be **hosting MoodleMoot UK 2010** on **13 & 14 April 2010**, shortly before Christmas. Pre-registration now stands at **310**, a great display of support and interest into MoodleMoot and an additional motivation to put on a great event; as if ever we needed one. We are aiming to release tickets before the end of February and will keep pre-registration open until then. To be amongst the first to know, simply [sign up to our mailing list](#) and we will be in touch once tickets become available.

We now also launched a dedicated [conference website](#), providing all information about MoodleMoot UK in one place. Most importantly at this stage, we opened the call for papers for the parallel breakout sessions and encourage submissions from all types of Moodle users and sectors. Detailed submission guidelines and the appropriate form can be found on our [conference website](#).

We will be hard at work, putting together two days packed with thought provoking keynotes and engaging workshops whilst offering you the chance to meet fellow Moodlers. So make sure you send in your proposal and share your experience and work with the community.

Finally we'd like to invite **sponsorship** for the event. There's a range of sponsorship options available ranging from exhibition stands in the breakout/catering area, evening entertainment sponsorship to the contribution of conference prizes. In the first instance please get in touch with either Tim or Frank in ULCC's marketing department at marketing@ulcc.ac.uk.

About ULCC

Established in 1968, University of London Computer Centre (ULCC) has evolved into a highly respected and innovative brand within the academic and not-for-profit sector.

Today, ULCC is dedicated to and passionate about its clients and its people. Through this dedication, ULCC offers leading edge IT solutions that empower clients and drive change within the marketplace.

Since 2006, ULCC has been developing a model for implementing personalisation tools using Open Source software. Learning providers are now able to move forward and realise the 'Harnessing Technology' agenda. As part of our e-Learning services, ULCC offers customisation of tools and technology for joined-up delivery and support of Personalisation of Learning, as well as engaging community involvement to shape future developments.

Other services include: co-location and managed server hosting, podcasting, web development, desktop support, digital preservation, video streaming and managed network services.
